

## Japan Third Party Co., Ltd. (JASDAQ, 2488)

### **Mission**

**JTP supports global hi-tech enterprises to get into the Japanese market with its knowledge and technology in the field of computer, communication and control.**

**JTP creates an open Japanese market in the international business society not only for JTP, but also society to produce international contributions.**

**JTP pursues an achievement of the mission and purpose that the "right action" should be fulfilled before seeking "profit" so as to assist a development of "Society" and "Client".**

Japan Third Party (JTP) has assisted many achievements supporting global hi-tech enterprises into the Japanese market from the day of its establishment in 1987. JTP is recognized as an exclusively specialized company, providing service and support of high-mix low-volume high-tech systems such as the IT application system in Japan. The product's life cycle is shortening due to the rapid technological innovation. On the other hand, support system promptitude of 24/7 and bilingual support are not to mention, but even a demand for advanced service quality is increasingly needed. JTP realizes these demands by adopting a proprietary quality management system and education management system. With a thesis of "What is the global level of support and service quality?" in mind, JTP will provide a business support system and service quality suitable for the world.

### **Quality policy**

**JTP utilizes all of our resources and capabilities.**

**JTP pursues improvement and development of the service quality.**

**JTP aims at maximizing customer satisfaction.**
